

Nebraska Department of Water, Energy, and Environment

The National Emission Standards for Hazardous Air Pollutants (NESHAP) and New Source Performance Standards (NSPS) notebooks are to be used as an assistance tool to help comply with state and federal regulations. The Notebooks are not inclusive and are not meant to serve as a substitute for compliance with all applicable regulations. If you have corrections, comments, or questions regarding the notebooks, NSPS, NESHAP or permitting, please contact us at DWEE.AirQuality@nebraska.gov or 402-471-2186.

Air Toxics Notebook

Storage Tanks– Control Level 2

eCFR 40 CFR Part 63 Subpart WW

40 CFR Part 63 Subpart WW	Storage Tanks– Control Level 2
Amendment Dates	07/12/2002 06/29/1999
Am I Subject to this subpart?	I. This subpart applies to: (A) Air emissions from storage vessels subject to another NESHAP that references this subpart. (B) See also Generic NESHAP 40 CFR 63 Subpart YY. “Generic MACT” standards are consolidated standards designed to cover multiple sources with similar emission types and MACT control requirements. Generic MACT standards are often established when there are less than five (5) facilities nationwide in a source category. (C) Other MACT standards may reference a Generic MACT. For example, Subpart YY facilities include: (1) Acetal resins production; (2) Acrylic/modacrylic fibers production; (3) Carbon black production; (4) Cyanide chemical production; (5) Ethylene manufacturing; (6) Hydrogen fluoride production; (7) Polycarbonates production; (8) Spandex production.
