

Nebraska Department of Water, Energy, and Environment

The National Emission Standards for Hazardous Air Pollutants (NESHAP) and New Source Performance Standards (NSPS) notebooks are to be used as an assistance tool to help comply with state and federal regulations. The Notebooks are not inclusive and are not meant to serve as a substitute for compliance with all applicable regulations. If you have corrections, comments, or questions regarding the notebooks, NSPS, NESHAP or permitting, please contact us at DWEE.AirQuality@nebraska.gov or 402-471-2186.

Air Toxics Notebook

Miscellaneous Metal Parts Surface Coating

eCFR 40 CFR Part 63 Subpart Mmmm

40 CFR Part 63 Subpart Mmmm	Miscellaneous Metal Parts Surface Coating
Amendment Dates	11/19/2020 07/08/2020 12/22/2006 04/20/2006 04/26/2004 01/02/2004
Am I Subject to this subpart?	I. This subpart applies to: (A) Major sources* of HAPs that use 250 gallons per year of HAP containing coating materials and coat metal parts. *Major Sources of HAPs emit or have the potential to emit: (1) ≥ 10 tons/year of any single HAP, or (2) ≥ 25 tons/year of total HAPs. Area Sources emit less than Major Sources. (B) If a facility is subject to multiple coating NESHAPs, it has three compliance options: (1) Comply with each NESHAP separately; (2) Comply with an emission limitation that represents the dominant surface coating activity; or (3) Comply with a facility-specific emission limit calculated from the relative amount of coating activity that is subject to each emission limit. II. Not Subject to this Subpart: (A) Sources that use only coatings, thinners and/or other additives, and cleaning materials that contain no organic HAP.

	(B) Surface coating at research or laboratory facilities, or is part of janitorial, building, and facility maintenance operations, or that occurs at hobby shops operated for noncommercial purposes. (C) Coatings used in volumes of less than 189 liters (50 gallons (gal)) per year, provided that the total volume of coatings exempt does not exceed 946 liters (250 gal) per year at the facility. (D) Performed on-site at installations owned or operated by the Armed Forces of the United States, the National Aeronautics and Space Administration, or the surface coating of military munitions manufactured by or for the Armed Forces of the United States. (E) Surface coating where plastic is extruded onto metal wire or cable or metal parts or products to form a coating. (F) Application of specialty coatings defined in appendix A to 40 CFR part 63, subpart GG to a metal aerospace vehicle or component. (G) Surface coating that meet the applicability criteria for the following NESHAPs (40 CFR Part 63): (1) Subpart JJ for wood furniture (2) Subpart NNNN for large appliances (3) Subpart RRRR for metal furniture (4) Subpart QQQQ for wood building products (5) Subpart GG for aerospace manufacturing and rework (6) Subpart II for shipbuilding and ship repair (7) Subpart JJJJ for paper and other web coating (8) Subpart SSSS for metal coil coating (9) Subpart VVVV for boat manufacturing, except where the surface coating of the boat is a metal coating operation performed on personal watercraft or parts of personal watercraft. (10) Subpart PPPP for plastic parts and products (11) Subpart IIII for automobiles and light-duty trucks. NSPS – 40 CFR Part 60 Subpart EE - Metal Furniture Surface Coating Subpart MM – Auto and Light-Duty Truck Surface Coating Operations Subpart SS - Large Appliance Surface Coating Subpart TT - Metal Coil Coating Subpart WW - Beverage Can Surface Coating Subpart TTT - Plastic Parts and Business Machines Surface Coating
